

MINK PRO i-Size

USER GUIDE

ATTENTION! Product graphics serve an illustrative function.

Please read the operating manual carefully before using the child car seat for the first time. Ensuring the safety of the child is your responsibility, and not reading this instruction may have an impact on it.

1.0 Car seat components

1. Carry handle
2. Button for releasing the car seat from the stroller frame.
3. Insert
4. Cover
5. Strap for adjusting the length of internal safety harness
6. Internal safety harness crotch strap with a pad
7. Internal safety harness buckle
8. Shoulder safety harness
9. Removable internal safety harness pads
10. Waist car seat belt guide
11. Button for adjusting the position of the carry handle
12. Sun shade
13. Shoulder car seat belt guide

14. Indicator of correct installation of the car seat on the base

15. Base mounting ISOFIX connector

16. ISOFIX connector release button

17. Lever for releasing the car seat lock

18. Adjustable support leg

19. Support leg extension release button

20. Support leg correct installation indicator

2.0 Usage

The car seat has been designed, tested and approved for use in accordance with the requirements of UN/ECE Regulation No. 129 concerning the approval of child improved restraint systems (UN/ECE R129/03).

The MINK PRO car seat is designed for children of a body size from 40 cm to 75 cm.

Maximum weight of the child: 13 kg.

A.1

A.2

Bouncer-rocker position	
Position for the baby carrier and installation on the stroller frame	Position for installation with the use of car seat belt

The car seat must be installed rearward facing (RWF) in the vehicle on the ISOFIX MINK FX base or with the use of the three-point car seat belt. The car seat can be installed in the car in the places indicated by the manufacturer in the vehicle manual. It is required to read the vehicle manufacturer's operating instructions. The child in the car seat is secured with internal safety harness.

ATTENTION! Never use the car seat in a forward facing position.

ATTENTION! If the child exceeds the maximum length of the body, stop using the car seat.

In order to set the car seat handle in the desired position, press the car seat handle adjustment button on both sides at the same time. After unlocking the handle, release these buttons and set the handle in a desired position. The handle should be automatically locked (fig. A.1)

The handle of the car seat can be locked in four positions shown in the table on the left side. (fig. A.2)

A.5

3.0 Safety instructions

WARNINGS

Please take a few minutes to read this instruction manual in order to ensure the proper safety of your child. Many injuries that are easy to avoid are caused by reckless and improper usage of the car seat.

- The car seat is designed to be installed only on forward facing vehicle seats. The car seat must not be installed on rearward facing or side facing vehicle seats. The car seat must always be attached to the base or secured with the three-point car seat belt (fig. A.4).
- A car seat **MUST NOT** be placed on seats with an active front air-bag as this could be dangerous. This does not apply to the side air-bags (fig. A.5).
- If the car seat is installed in the front seat, the front air-bag must be deactivated. It is recommended to install the car seat only on the vehicle back seats. Please refer to your vehicle operating manual for information on the suitability of the vehicle seat for use with a car seat.

- Remember that the internal safety harness holding the child should be adjusted to the child's body shape and not twisted. For this reason, the child should not wear thick clothes under the safety harness.
- The car seat should be replaced when it has been subjected to violent stresses during a traffic accident.
- The car seat may not be modified in any way without the acceptance of the relevant approval authority. Failure to install the car seat in accordance with the manufacturer's instructions may pose a threat to life and health.
- Protect the car seat from direct sunlight, otherwise your child may be burnt by heated parts. Protect your child and the car seat from sunlight.
- Never leave your child unattended in the car seat.
- Make sure that luggage and other objects are adequately secured, in particular on the shelf under the rear window, as they can cause injuries in the event of a collision.
- The car seat cannot be used without the cover.
- Do not use replacement covers, other than those recommended by the manufacturer, as the cover is an integral part of the safety system of the car seat.

- Do not use any other attachment points than those described in the instruction manual and marked on the car seat.
- All hard parts and plastic parts of a car seat must be positioned and installed in a way that prevents them from being trapped by a sliding seat or vehicle door under normal vehicle operating conditions.
- Regularly check the technical condition of the car seat, pay special attention to the fixing points, seams and adjusting elements. It is important to ensure that all mechanical elements are fully operational. Never grease or oil parts of the car seat.
- Do not use the car seat if its parts are damaged or loose.
- In the event of an emergency, it is important to quickly unfasten the seat belt. This means that the release button of the safety harness is not fully secured; make sure your child does not play with the safety harness.
- Set a good example for your child and wear your car seat belt at all times. An adult who is not fastened with a car seat belt can also pose a threat to a child.
- Make sure that the car seat is correctly secured before each journey in the car.
- The car seat must be secured at all times, even when not in use.

The car seat that is not secured can injure the passengers even during emergency braking.

- Never let your child sleep in this product. This product is not a substitute for a cot or bed. If your baby needs to sleep, it should be placed in a proper cot or bed.
- Do not use the product if any of its components are damaged or missing.
- Do not use accessories or replacement parts other than those recommended by the manufacturer

B.1**B.2**

> 60 cm

**4.0 Use of insert**

The insert (3) serves to support and protect the head and back of a very small child. The insert prevents the child from collapsing inside or sliding down and ensures a proper physiological position of the child in the car seat.

4.1. Installation of the insert (fig. B.1)

- Unfasten the internal safety harness (8) by pressing the red button on the buckle (7).
- Place the insert in the car seat so that it adheres to the sides.
- Adjust the position of the safety harness by guiding it under the headrest part of the insert.

4.2 Adjustment of the insert to the child's height

When the child reaches the height of 60 cm, the insert (3) must be removed to give the child more space inside the car seat (fig. B.2).

5.0 Installation in the vehicle

In the event of sudden braking or an accident, people not wearing car seat belts may injure other passengers.

Always check whether:

- The seat backrests in the vehicle are locked (i.e. the folding backrest of the rear seat is latched).
- All heavy and sharp-edged items are secured (e.g. on the rear shelf).
- All passengers have fastened their car seat belts.
- The car seat is always secured even if the child is not transported in it.

C.1

C.2

C.3

C.4

5.1 Rearward facing car seat installation for children between 40 and 75 cm using the ISOFIX MINK FX base

5.1.1 installation of the ISOFIX MINK FX base

- Unfold the base support leg (18) (fig. C.1).
- While holding down the ISOFIX connector release button (16) (fig. C.2), pull the connector out of the base (19) as far as possible (fig. C.2). Repeat it on the other side of the base.
- Place the base on the vehicle seat and hook the ISOFIX base connectors (16) into the car connectors. You will hear a click and the indicators should turn green (fig. C.3).
- Move the base as close to the backrest of the seat as possible. When moving the base, make swinging movements - alternately move one side, then the other, until the base fits evenly to the backrest of the seat (fig. C.4).

ATTENTION! With a properly installed base there is no gap between the backrest of the vehicle seat and the shell of the base (fig. C.5).

- Press the base support leg extension release buttons (fig. C.6). Adjust its length until it touches the floor of the car (fig. C.6). The indicators at the bottom of the support leg (20) should turn green. If they turn red, repeat this step.

ATTENTION! The properly positioned support leg should be slightly inclined forward (fig. C.6). In a correctly positioned leg, the indicators should be green. If the indicator at the bottom of the support leg is red, it must be repositioned.

ATTENTION! Never install the support leg on the storage compartment in the floor of the car. It may tear the storage compartment in the event of an accident and reduce the safety provided by the base.

C.7

C.8

5.1.2 Installation of the car seat on the ISOFIX MINK FX base

Place the car seat on the base as shown in figure C.7. Position the car seat perpendicularly to the base - you will hear a click.

ATTENTION! The car seat can be installed on the base in the rearward facing position only (fig. C.8).

The car seat is installed correctly when the indicator on the base (20) turns green. If the indicator on the base is red, the car seat should be reinstalled.

C.9

C.11

C.12

C.10

C.13

5.1.3 Removing the car seat from the ISOFIX base and removing the base

In order to remove the car seat from the base, move the lever (17) to the left and hold it, then press the button (2) to release the seat. (fig. C.9, C.10)

To remove the ISOFIX base, first fold the leg extension while pressing the release button (fig. C.11). Then, while pressing both ISOFIX connector release buttons, pull the base towards you (fig. C.13). This way the ISOFIX connectors (15) will come out. Now pull the buttons on the connectors towards you (fig. C.12). The ISOFIX base connectors and the vehicle seat connectors shall disengage. You can remove the ISOFIX base from the vehicle.

5.2 Forward facing car seat installation for children between 40 and 75 cm using the car seat belt

ATTENTION! The car seat must be installed in the rearward facing position.
 ATTENTION! Never install the car seat on a seat with an active front air-bag.
 ATTENTION! Before starting the installation, make sure that the seat is equipped with a three-point car seat belt. This refers especially to the middle seat.

- Set the handle of the car seat (1) in the carrying position (fig. A.2), and then place the car seat on the back seat of the car in close proximity to the backrest of the back seat. The car seat should be placed in the rearward facing position (fig. D.1).
- Extend the car seat belt as far as possible. Pull the car seat belt through both waist safety harness guides (marked green) in the car seat and fasten the car seat belt buckle (fig. D.1).
- Pull the shoulder part of the car seat belt through the shoulder car seat belt guide (14) marked green, located at the back of the car seat (fig. D.1).

D.2

- For maximum tightness of the car seat belt, pull its waist part towards the car seat belt buckle and the shoulder part in the opposite direction. First tighten the waist section of the belt, and then the shoulder section.
- Set the handle of the car seat (1) to the position for installation with the use of car seat belt (fig. D.2).

ATTENTION! Make sure that the car seat belt is correctly guided, tightened, not twisted and has not slipped off the guides (fig. D.2). ATTENTION! Make sure the position of the car seat is set well and stable.

E.1

E.1.2

6.0 Using the sun shade

The sun shade (13) is used to prevent direct sunlight on the child's face.

6.1 Installation of the sun shade

- Set the car seat handle (1) to the carrying position (fig. A.2).
- Place the fastener of the sun shade in the appropriate place on the handle of the car seat (fig. E.1).

To remove the sun shade, follow the above steps in reverse order.

6.2 Unfolding and folding the sun shade

When using the sun shade, first place the set in the carrying position (fig. A.2) and then attach the sun shade to it. When the sun shade is not in use, release the hooks from the handle and tilt it back to expose the inside of the car seat. (fig. E.1.2)

7.0 Using the car seat

7.1 Adjusting the position of the internal safety harness and the headrest

The adjustment of the car seat safety harness is integrated with the adjustment of the headrest. The headrest should be adjusted according to the child's height. The height of the safety harness will change with the height of the headrest. Adjust the appropriate height of the shoulder part of the safety harness so that the harness enters the seat backrest at the height of the child's shoulders or slightly above (fig. E.2).

E.3

E.4

In order to correctly position the child's head, make sure that the lower part of the headrest is in line with the child's chin (fig. E.4). Before changing the position of the headrest, loosen the inner belts (point 7.2) by pressing the adjustment button while pulling the shoulder straps towards you.

- In order to raise the headrest and internal shoulder safety harness, pull the headrest adjustment handle until it unlocks (fig. E.3). The headrest and shoulder safety harness will be raised at the same time.
- In order to lower the headrest and shoulder safety harness, pull the headrest adjustment handle and lower the headrest (fig. E.3). The headrest and shoulder safety harness will be lowered at the same time.

ATTENTION! Proper adjustment of the headrest height has a direct impact on the child's safety.

E.4

E.5

E.6

E.7

7.2 Adjusting the length of the internal safety harness and fastening the child in the car seat

- Adjust the position of the internal safety harness to the correct height (see point 7.1)
- Place the car seat on a level surface and set the handle (1) to the position for placing the child in the car seat.
- Unfasten the internal safety harness - press the red button on the internal safety harness buckle (7), (fig. E.4).
- Loosen the internal safety harness - press and hold the internal safety harness adjustment button (5) while pulling the safety harness towards you (fig. E.5).
- Set both buckle latches aside. This will make room for the child in the car seat (fig. E.6).
- Put the child in the car seat
- Fasten the internal safety harness

E.7

E.8

E.9

E.10

- Put the child in the car seat and fasten the internal safety harness (fig. E.7) - fold both buckle latches together to engage them, then insert them into the buckle hole (7). A “click” sound will be heard to indicate that the buckle is locked (fig. E.7). Make sure that the child is correctly placed in the car seat, with the back completely adjacent to the car seat.
 - Tighten the internal safety harness - pull the internal safety harness adjustment strap (5) in the direction of the arrow (fig. E.8) located at the front of the car seat until the safety harness fits close to the child's body. **ATTENTION!** Proper tension of the safety harness is ensured if the space between the shoulder part of the safety harness and the child's chest does not exceed approximately 1 cm (thickness of a finger), (fig. E.9).
 - Loosening the safety harness - press and hold the adjustment button on the front of the car seat and simultaneously pull both safety harness straps towards you.
 - Fastening the safety harness - pull the middle strap at the front of the car seat down until the seat belt adjusts to the child's body. Make sure the waist part of the safety harness runs low so that the pelvis is held securely.
- ATTENTION!** Make sure that the safety harness is not twisted or crossed (fig. E.10).

F.1

ATTENTION! The safety harness buckle should be closer to the child's crotch than to the belly.

8.0 Maintenance instructions

8.1 Removing the cover (fig F.1)

- Remove the sun shade (see point 6.1).
- Press the safety harness release button (7) and make it loose.
- Remove the insert if it is used (see point 4.1).
- Remove the shoulder pads:
 - undo the pad snap fasteners, unfasten the strip connecting the pads, pull the strip through the holes in the headrest and the cover.
- Remove the cover from the headrest of the car seat.
- Unfasten the cover fasteners located on both sides of the car seat.
- Remove the cover from the edges of the car seat
- Guide the internal safety harness, the internal safety harness adjustment strap and the buckle through the holes in the cover.

NOTE: For safety reasons, frequent removal is not recommended.
To install the cover, follow the above steps in reverse order.

8.2 Cleaning

Only the original cover (4) should be used, as it is an essential element of the car seat safety.

- The cover can be removed. Machine wash in warm water (up to 30°C) using a mild detergent. Leave to dry. Do not spin, do not tumble dry, do not use bleach.
- The pads can be removed and hand washed (below 30°C) in warm soapy water. Leave to dry, do not spin, do not tumble dry.
- The insert should not be washed; if necessary, it can be cleaned by hand because it is not possible to dry the foam inside.

ATTENTION! Never use strong detergents or bleaches.

- The plastic parts can be cleaned with water and a mild detergent. Do not use strong detergents (e.g. solvents). Do not use oil.
- The safety harness can be cleaned with a damp cloth and lukewarm water using a mild detergent. Avoid getting the belts too wet.

ATTENTION! The internal safety harness system must not be dismantled! Never disassemble individual parts of the internal safety harness.

F.2

9.0 Installation of the car seat on the stroller frame

ATTENTION! Before installation the car seat on, and removing it from the stroller frame, always engage the parking brake to prevent the stroller from rolling away uncontrollably.

- Guide the stroller frame adapters into the slots in the car seat and push them down until you hear a "click" sound (fig. F.2).
- Place the car seat on the stroller frame in such a way that the child's gaze is directed towards the stroller handle (fig. F.2).

Removing the car seat from the stroller frame:

- Press the release buttons (2) on the sides of the car seat while lifting the car seat.

ATTENTION! Please refer to the stroller manual for information on car seat compatibility.
